Patrick Vogel sculptures and products are a unique blend of design, engineering and the art of fabrication. Few artists can match his passion for design; none can match his working knowledge of metallurgy. From conceptualization to creation, his artistic skills are in demand.

Patrick was raised in Torrance, the son of a master boat builder. He learned woodworking as a child and began welding at the age of nine, helping his father build Alaskan fishing trawlers and custom yachts . While in school, Patrick built high performance race cars for Mc Clusky Ltd. and pursued metal art projects on the side.

For over 15 years Patrick has run his own design and metal arts fabrication shop. His work has included a wide array of metal products including boat fishing towers, fuel tanks, stainless steel staircase railing, awnings, entranceways, restaurant signage, display racks, and motorcycle wheels. Vogel offers furniture art including desks, chairs, bed-frames and outdoor stainless steel benches.

Patrick's current focus is the creation of lasting public art sculpture. He has an impressive record of success with clients including: The Wrigley Family, the Catalina Conservancy, Boeing Aircraft, Warner Brothers, the Cities of Long Beach, Lakewood, Signal Hill, City of Fort Worth, Texas, King County, Washington, County of Los Angeles, Long Beach Public Corporation for the Arts, US Aero and the J. Paul Getty Museums in Los Angeles and Malibu.

Patrick completed the Mechanical Engineering program from California State University, Long Beach. He has taken advanced coursework in AutoCAD, Mechanical Desktop and Solid Works and is a recognized industry design expert with these and other engineering software packages.
